# Connecting to WC-Secure on Windows 11

- Click on the Network icon in the bottom right of your taskbar

- Click on the dropdown beside the wifi icon and select **WC-Secure** in the list of available networks

- Select **Connect** when prompted to Continue Connecting

- You will be prompted to enter your Westminster user name and password, then click OK

- You may be asked a second time to confirm that you wish to continue connecting. Click on Continue
- You should now be connected to WC-Secure
