Career Center Handbook
JOBS FOR TODAY- CAREERS FOR TOMORROW

Westminster College Career Services educates, prepares, and assists students and alumni as they pursue the career development and job search process in a global and dynamic world of work.

Services and Programs Include:
• Job postings for all on-campus, part-time, and off-campus employment
• Career counseling for self-assessment, career exploration, choosing a major and career decision making
• Career Resource Center, which includes a computer for assessments and job searching
• Quiet facilities for phone and webcam interviews
• Assistance with searches for full and part-time employment, and internships
• Resume, curriculum vitae, and cover letter reviews
• Mock interview coaching with optional video-recording
• Fall & Spring WestPACS Job and Internship Fair
• Graduate School preparation
• Classroom presentations by staff professionals
• Miller Analogy Testing
• “Classroom to Career” Career Services Handbook

CAREER DEVELOPMENT

Choosing a Career

Career development is a process used throughout your life as you make changes in what you want to do, where and how you want to do it, and what you want in return. Jobs will come and go, and the skills required to do your work will continually change just as your interests, skills, and values change.

This process is not meant to be a short step-by-step process with a definite conclusion. You may find yourself backing up and going through some of the steps several times. Each time you cycle through the process, you are working closer toward more satisfying choices.

Throughout career development, it is common to experience confusion, anxiety, and fear since career decisions often impact many facets of your life. The important thing is to recognize these concerns and overcome them by utilizing the techniques outlined in this section. Take a few minutes to find out if any of the following statements sound like you.

"My career has to meet all my needs."
A career includes all of your life pursuits, both paid and unpaid. You can end up spending a lot of time looking for "the perfect career." What you need to do is find out what is really important and balance your life so that you can satisfy desires that matter most.

"I'm stuck with this major/degree."
That's not exactly how it works. Just because you chose a major or graduated with a certain degree doesn't mean you're locked into that field. It's a degree, not a life sentence. Career counselors can help you explore your options. Despite the myth, employers do not hire majors— they hire people who have the skills necessary to do the job. That means you can choose to work in a field other than your college major.

"I have to make the absolute right decision."
Worrying about making the "correct" choice will just cause you stress. There are not absolute right or wrong answers. We all grow through life and make decisions because they seemed like the best idea at the time. The way you can end up feeling more confident is to do some research. Knowing that you have looked into it and that you are making an informed decision should lighten the burden. Also, don't make your decision solely on someone else's ideas.

"My job determines my worth."
One definition of success is being happy with what you do. It is not about satisfying others' expectations of what is "good for you." You are the one who will be doing this job, not everyone else. Focus on what works for you. If you are happy, those who care about you will be too. And, by the way, you are much more likely to be successful if you choose what you love. By doing so, you will feel more connected with purpose and fulfillment.

"My first job will determine my entire career."
On average, people have between three and five career changes in their lives. You right start out in one area and realize it's not what you wanted and try something else. That's normal.
Identifying Your Interests

Interests are ideas that capture your mind. They are what you want to think about and what you like to put your energy into. To be successful in any career, you will need to invest a great deal of energy. This is more likely to happen if you choose something that genuinely interests you.

Use these questions to help qualify possible areas of interest you might want in a job or a career.

_________________________________________________________ What do you love to do in your free time?
_________________________________________________________ Is there anything you could talk about for hours?
_________________________________________________________ Think back to the last time you stayed up until 3 a.m. in a deep conversation—what was it you were talking about?
_________________________________________________________ What school subjects do you like?
_________________________________________________________ Have you taken a class that you looked forward to going to?
_________________________________________________________ If you were at a party and a group was engaged in an intense discussion, what subject would make you want to join in?
_________________________________________________________ With what social or community group(s) do you identify or devote your attention?
_________________________________________________________ What magazines do you read?
_________________________________________________________ What section of the newspaper do you read first?
_________________________________________________________ What sections do you head to in bookstores and libraries?
_________________________________________________________ What internet sites do you like to browse?
_________________________________________________________ Are there any classes that intrigue you?
_________________________________________________________ If you were to write a book, what would it be about?
_________________________________________________________ Have you ever gotten so absorbed in doing something that you lost track of time? What were you doing?
_________________________________________________________ Are there situations in your life that were "defining moments" and have shaped your interests today?

Now, step back and look at your answers to the questions above. Reflect on your answers and write down your observations. Are there any patterns or common themes? Do you see any connection between your interests and your values?

Identifying Your Skills

Understanding your current skills and abilities is important in the career development process. Be sure to keep in mind not to limit your options based only on what you can already do. Now is the time to explore all your options and start working to also develop new skills that will make you competitive once you are ready to apply for a job. Use this list to start identifying your current skills.

INTERPERSONAL SKILLS
- Knows how to express feelings warmly and sensitively
- Gives and receives feedback in a constructive manner
- Knows how to interpret and use body language
- Recognizes and values the uniqueness of individuals; works well with a wide variety of diverse people

ORAL COMMUNICATION SKILLS
- Presents information and ideas clearly and concisely, with content and style appropriate for the audience
- Presents opinions and ideas in an open, objective way

PUBLIC SPEAKING SKILLS
- Makes formal presentations
- Presents ideas and positions in an interesting way
- Maintains poise in public situations

COUNSELING SKILLS
- Responds to others in a non-judgmental way
- Builds trust and openness with others
- Helps others understand themselves better and builds self-esteem

COACHING/MENTORING SKILLS
- Gives appropriate advice in a persuasive way
- Gives feedback in a constructive way
- Helps others increase their knowledge or skills
- Works and communicates with others to satisfy their needs and expectations

TEACHING/TRAINING SKILLS
- Motivates people to learn new things and to perform well
- Adjusts content and teaching style to the audience

SUPERVISING SKILLS
- Motivates individuals to perform well
- Identifies and uses human resources in an effective way
- Delegates responsibilities and establishes an appropriate system of accountability
- Monitors progress and assesses the quality of job performance of others

LEADERSHIP SKILLS
- Motivates and empowers others to act
- Inspires trust and respect in others
- Builds effective teams
- Involves others without coercing or cajoling
- Promotes open discussion and involvement of all participants while not dominating
- Facilitates and manages group interactions
- Delegates effectively

PERSUADING SKILLS
- Communicates effectively to justify a position or influence a decision
- Able to sell products and promote ideas
- Effective in lobbying for change

MEDIATION SKILLS
- Helps those with opposite viewpoints reach mutual agreements, either through consensus or compromise
- Deals with conflict in an open, honest, and positive way

INTERVIEWING SKILLS
- Asks and responds to questions effectively, able to make others feel relaxed and creates a feeling of trust

CARE GIVING SKILLS
- Identifies and responds appropriately to the need for care, counseling, treatment, or therapy
- Patient and empathizes with others
- Gives sensitive care to people who are sick or elderly or who have severe disabilities

CLIENT SERVICE SKILLS
- Builds a relationship of mutual trust with clients
- Understands or perceives clients’ needs
- Acts as an advocate for clients
- Handles complaints and concerns in a sensitive way
- Tailors services to meet the needs of an individual’s goals

ANALYTICAL/LOGICAL THINKING SKILLS
- Draws specific conclusions from a set of general observations (deductive reasoning)
- Draws general conclusions from set of specific facts (inductive reasoning)
- Examines data to understand inter-relationships and correlations
- Synthesizes information and ideas
- Clarifies the nature of a problem, evaluates alternatives, proposes viable solutions, and determines the outcome of the various options
CRITICAL THINKING SKILLS
- Reviews different points of view or ideas and makes objective judgments
- Examines underlying assumptions
- Formulates a question, analyzes a problem, or defines a situation with clarity, accuracy, and fair-mindedness
- Reviews or develops policy and programs
  Identifies all possible options, weighs the pros and cons, assesses feasibility, and chooses the most viable option

CREATIVE THINKING SKILLS
- Generates new ideas, invents new things, and creates new images or designs
- Designs new approaches to solve problems
  Makes connections between seemingly unrelated things
- Reshapes goals to reveal new possibilities
- Uses wit and humor effectively

PLANNING SKILLS
- Lays out a step-by-step process for achieving a goal
- Establishes objectives and needs, evaluates options, and chooses the best option
- Analyzes all the requirements (i.e., human, financial, and material resources) to accomplish specific goals
- Establishes realistic timetables and schedules

ORGANIZATIONAL SKILLS
  Organizes information, people, or things in a systematic way
- Establishes priorities and meets deadlines
- Develops or streamlines procedures
- Monitors progress and effectiveness

ADVANCED WRITING SKILLS
- Selects, interprets, organizes, and synthesizes key ideas
- Adjusts style, form, and content to a particular audience
- Drafts non-routine correspondence and complex reports
- Writes in a creative way for the general public
- Edits written text to ensure that the message is as clear, concise, and accurate as possible

ADMINISTRATIVE/Clerical SKILLS
- Operates computers and other basic office equipment
- Designs and maintains filing and control systems

FINANCIAL SKILLS
- Keeps accurate financial records
- Manages a budget
  Establishes and maintains accounting and auditing procedures
- Prepares and interprets financial statements and reports
- Monitors inventory flow

LANGUAGE SKILLS
- Fluent in language(s) other than the one dominant in the organization

PERCEPTUAL SKILLS
- Visualizes new formats and shapes
- Estimates physical space

ADVANCED COMPUTER SKILLS
- Learns new software quickly
- Manipulates data in a computer system

TECHNOLOGICAL SKILLS
- Understands technical specifications; reads technical manuals with ease
- Maintains computer or other systems; analyzes potential dysfunctions and troubleshoot for potential problems
- Suggests modifications to an existing system or designs a new system to improve performance

PERFORMING SKILLS
- Entertains, amuses and inspires an audience
- Acts, sings, or plays an instrument in public

ARTISTIC SKILLS
- Draws diagrams and illustrations
- Uses color and design creatively
- Designs displays and publicity material

MECHANICAL SKILLS
- Installs, repairs, operates, and monitors the performance of equipment and mechanical devices

ADAPTABILITY SKILLS
- Capacity to adapt to new situations and settings and to tolerate change well
- Sees change as an opportunity, rather than as a problem
Self-Assessments

Can’t figure out what major you want to choose? The Career Center offers many options for you.

Self-Directed Search: This easy-to-use, comprehensive career exploration tool asks questions about the individual’s aspirations, activities, competencies, occupations, and other self-estimates. The resulting three-letter Summary Code, which designates the three personality types an individual most closely resembles, can then be used to help the individual find his or her occupational match.

Card Sort: Simple and effective tool that allows students to prioritize their values and interests in a small amount of time.

Choosing a Major

Choosing a major is not the same as choosing a career. What you get from completing a degree are skills, knowledge, interesting experiences, and the ability to be an independent learner. What you do with them is entirely up to you. It is true, however, that some professions do require certain degrees or certifications, such as teaching, engineering, architecture, or nursing, to name a few.

Basically, the more a career requires specialized expertise, the more necessary it is to have a related degree. Don’t worry if you already have a major or have to choose one soon and you really have no idea what you want to do. If you choose a major that excites you, most likely you will work harder, do better, and find something that you truly enjoy.

Keep in mind that your first job after graduation is probably only the first step of many toward realizing your career goals. The creation of new job titles and career fields is continuous, so selecting a career is not a one-time decision, but an ongoing process.

“To-Do” List

FOUR-YEAR GUIDELINE

FIRST YEAR:

- Meet with a career counselor to assess your interests and to help you decide on a major
- “Sit in” on a class to explore a major
- Browse the books, tapes, resources in the Career Center for information on majors/careers
- Become involved in on-campus activities
- Request list of former internship sites from Career Center to aid in planning an internship
- Begin to document your achievements for a co-curricular transcript/e-portfolio
- Find a summer job in your field to explore a career and gain experience

SOPHOMORE YEAR:

- Shadow someone in a career that you wish to explore
  (Career Center staff will help to arrange it)
- Attend workshops on resume/cover letter writing and interviewing
- Seek individual assistance at the Career Center to develop your resume
- Participate in the annual spring “Internship/Summer Job” event
- Read on-line PT Job/Internship Newsletter on Career Center website to find internships and summer jobs
- Seek out leadership roles on and off campus
- Update information for co-curricular transcript and e-portfolio
- Serve an internship
Developing Your Skills

Obtaining a college degree is an important step in pursuing your career goals. However, a degree is no longer enough to be competitive. It is equally as important to develop your skills and abilities through experiences such as campus and community involvement, part-time work and internships.

When evaluating a candidate’s ability, employers look beyond just knowledge gained in the classroom. They look for significant skills such as teamwork, communication and organization. Most employers consider these skills equally as important as a degree and will often ask you to demonstrate in an interview how you have obtained these skills.

Making the connection from college to your career is easier than you think. Once you have decided on a major, it is time to enhance your employable skills by gaining experience through various activities.

In addition to developing your skills, you are building a network of people who can help you throughout your career development and job search process.

Campus Involvement

Involvement in a student organization is a great way to develop valuable skills and expose yourself to your chosen field of study. Westminster College has more than 100 academic, social, and special interest student organizations that provide an excellent opportunity to develop leadership skills and network with industry professionals.

Class Projects

Many capstone classes offer students a chance to practice the concepts they are learning in class in a real-life context. It may feel like you are only doing it for class credit; however, a class project can be a great chance to demonstrate your knowledge of a subject area.

Part-time/On-campus Employment

Having previous work experience is a critical aspect of gaining future employment. Part-time, temporary and even summer jobs offer an opportunity to develop important skills and demonstrate your ability to perform well as an employee. Many college students downplay their work experience thinking that it is not significant unless it is career-related. However, every job requires you to use many important skills, such as teamwork, communication, initiative, and adaptability. Do not underestimate the value of these part-time jobs. For example, “cashiering” demonstrates responsibility, organization, communication and computer skills.

“To-Do” List

FOUR-YEAR GUIDELINE

**JUNIOR YEAR:**
- Research potential employers/internships
- Attend Career Center informational programs, panels and special events
- Attend graduate school fairs; note application deadlines for graduate schools
- Research graduate school scholarship/fellowship opportunities
- Attend Job Fairs for internship opportunities
- Update your resume and e-portfolio information
- Attend Career Center workshops to develop job search skills
- Attend “Networking Skills” program
- Review on-line PT Job and Internship newsletter
- Serve another internship

**SENIOR YEAR:**
- Attend “Senior Seminar” to sharpen the skills of the job or graduate school search
- Apply to graduate schools early, if planning to continue education
- Apply for graduate school scholarships/fellowships, if appropriate
- Participate in a mock interview and/or a videotaped mock interview
- Attend “Dine ‘n Shine/Dress for Success/Life Skills” program
- Update your resume and create or update your e-portfolio
- Participate in on-campus interviews with prospective employers
- Communicate with alumni for informational interviews
- Read Career Center’s on-line Job Bulletin for employment opportunities
- Attend Job Fairs
- Serve yet another internship
International Programs

Study Abroad
Participating in a study abroad program is a significant and exciting part of completing a university degree. Graduates can gain an edge in the job market with their more in-depth understanding of language, culture and diversity. Internship opportunities may also be available, further enhancing your international work experience. Proper paperwork and registration for internships is still required through the Career Center.

For more information contact:
Dr. Jamie McMinn at 724-946-7121 or mcminnjg@westminster.edu

Informational Interviews

The purpose of informational interviewing is to learn more about an occupation or industry in which you are interested. An informational interview is not a time to ask for a job. However, it can lead to building a network of professionals inside a field or company which may open up opportunities for future employment.

To arrange an informational interview, email, call or send a letter to the person you would like to interview. Most people remember what it was like to be in your shoes and are happy to help. If the person declines your offer, simply ask if they can refer you to someone else and thank the person for his/her time.

Examples of Questions to Ask

- What training is required for this type of work?
- What personal qualities or abilities are important to being successful in this field/position/company?
- How did you end up in this position?
- What has been your career path?
- What do you do on a typical day in this position?
- What part of this job do you find the most challenging or satisfying?
- What are the “hot topics” in this field?
- How many hours do you typically work in a week?
- What is the corporate culture here?
- What advice would you give a person entering this field?
- How does your job fit into the organization?
- How do you find out about job openings in this field?

Top 10 Skills Employers Look for in a Candidate

According to research by the National Association of Colleges and Employers (NACE), these are ten top skills that employers are looking for in an ideal candidate:

- Communication skills
- Interpersonal skills
- Honesty/Integrity
- Teamwork skills
- Motivation/Initiative
- Strong work ethic
- Analytical skills
- Flexibility/Adaptability
- Computer skills
- Self Confidence/maturity
A Sample Script for Setting up an Informational Interview

"Hello, my name is and I am currently a junior at Westminster College. I am majoring in Broadcast Communications and I am interested in your field of work.

I am trying to determine my future career direction and was wondering if you would mind sharing your insight with me. Would you be willing to spend 20 to 30 minutes with me to discuss your experiences?

I am happy to meet you at your office at a time that is convenient for you."

Dress professionally when going to your informational interview. Bring a notebook and prepared questions. Be punctual and polite. Remember to listen attentively and express your gratitude to the person for sharing his or her time and insight. Be sure to get his or her business card and send a follow-up thank-you call, e-mail or letter.

Shadowing

Shadowing or externships can vary in length, but usually last one or two days. A typical externship involves shadowing a professional through a normal day’s activities and may include informational interviews, a tour of the facility, and participation in actual office projects.

Shadowing is different from an internship. It is usually short-term (one to two days), offers no pay or academic credit, and is hosted by volunteers in various organizations to help students gain an insider’s view of a career field. Taking advantage of an externship experience can help students assess the day-to-day life of a professional career field they are considering. An externship can also be a foot in the door to a company you are interested in applying to at a later date.

Internships

Typically, an internship lasts for at least a semester or summer and no more than one year. Decidedly different than a part-time job, internships are designed to connect your classroom experiences to the real world through hands-on projects and mentoring relationships. Internships may be for pay and/or for academic credit.

Benefits of an Internship

- Helps you develop a competitive edge over other candidates in the hiring process
- Broadens your career knowledge and can strengthen your career decision
- Socializes you to the world of work including ethics and professionalism
- Reinforces classroom learning and assists you in going from simply knowing something to being able to apply that knowledge
- Gives you a realistic picture of what a career will actually be like

Preparing for an Internship

Take the appropriate classes in order to build a framework for your internship. Participate in informational interviewing, job shadowing, and externships to gain exposure to your field. Decide which type of internship is best for you: academic or not-for-credit internship.

Finding an Internship

To find the appropriate internship for you, utilize many resources, including “The Internship and PT Job Newsletter”, company websites, and job search engines such as indeed.com or careerbuilder.com. Network with alumni, family, friends, your current employer, faculty, and academic advisors to learn about possible internship opportunities. You should also contact your academic advisor and/or the Career Center.

Academic Internships

Academic internships are credit-bearing internships offered through academic departments. Currently, all departments offer credit internships. Each academic department sets its own criteria for awarding credit for internship experiences. This criteria can vary from keeping a log, writing a final paper, or presenting a comprehensive portfolio of learning.

Take the quiz, Are You Ready for an Internship?, to see if an internship is your next step.
Are You Ready for an Internship?

Take the Internship Readiness Quiz to determine whether or not you are ready and what you need to do to prepare yourself.

Please rate each statement on a 0 - 4 scale:

0 =Strongly Disagree, 1 = Disagree, 2 = Uncertain, 3 =Agree, 4 =Strongly Agree

1) I would like to extend what I am learning beyond what is possible in the classroom.

2) I sometimes wonder how what I have been learning in the classroom applies to the real world.

3) I have prepared for the internship by completing general coursework related to the nature of the internship.

4) I would like to identify areas for further coursework.

5) I can adequately devote enough time to both coursework and internship work.

6) I have researched the industry and/or a particular career path to support my interest in an internship through library and internet resources, visiting my Career Services office, and/or conducting informational interviews, job shadowing, and externships.

7) I have begun developing related skills through activities such as participation in clubs and associations, volunteerism, and other work.

8) I can articulate my learning objectives and goals for the internship.

9) I would like to affirm or disaffirm a particular career path.

10) I would like to gain work experience for future employment.

Total Points

Scale:

32+ ................ Ready for an internship

28-31 ................ Need to consider potential obstacles before starting an internship

24-27 .................. Careful planning and rethinking of priorities will be necessary to begin an internship under 24 ................ Consideration of other options may be best
RESUMES

Formatting Your Resume
The purpose of a resume is to get an interview, not a job. Typically, an employer will only spend 30 to 60 seconds looking at your resume before deciding whether or not to consider you for an interview. You want the employer to immediately see that you have the necessary background and qualifications.

There are many ways to organize and format your resume so that you highlight the most relevant skills and experiences. To get you started, there are three basic types of resumes—the chronological, functional, and hybrid resume.

Chronological Resume
Most common resume type and is preferred by most employers.
Lists your work experience in descending order starting with your most recent job.
This resume format stresses your work history.

Functional Resume
Highlights your skills rather than your work history.
The trick to having a successful functional resume is to demonstrate how you have obtained a certain skill or ability through class work, volunteer or leadership experience.
This format is often used if you have limited work experience or if you are trying to break into a new career field and want to highlight your transferable skills.

Curriculum Vitae
Recommended for use by graduate students. A far more comprehensive resume that elaborates on education and includes specialized training, presentations, publications, research, posters, and conferences.
Usually used for academic and medical occupations.

In most cases, a one-page resume is sufficient to convey the most significant information. Sometimes, it can be difficult to choose what to leave off; however, you don’t want the employer to get bogged down reading a lengthy resume.
Individuals with more experience may need two pages if they have enough relevant information to fill at least half of the second page.

• Use standard font styles such as Times New Roman or Arial. All text on your resume should be the same size (10 to 12 point) except your name which should be larger.

Resume Templates
Resume templates, like the ones you find on the internet, are not recommended. Templates force your information into a specific format and do not necessarily allow you to highlight your unique qualifications in the most effective way. Because templates utilize text blocks, the information is hard to manipulate around the page when you want to update your information.

Instead, create your resume in a blank, Microsoft Word document and follow the general guidelines in this section.

• All margins should be the same. One-inch margins are a good starting point, but you can go slightly smaller if necessary.
• Use bullet points to highlight information.
• Section headings should in bold and may also be capitalized or underlined for emphasis.

Addressing Gaps in Your Resume
No doubt you have heard the phrase, “Don’t have gaps in your resume.” Employers understand that getting your education is your full-time job right now. Throughout high school and college, employers expect that you may have taken periods of time off and they look at more than just work experience when evaluating your qualifications. Do not worry about small gaps of time on your resume while you are pursuing your education.

Having wide gaps in your resume is more of a concern once you have completed your education and started your career. With that said, there are legitimate reasons to take time off of work and it does not necessarily mean that an employer will look negatively upon a gap. Here are some tips for addressing extensive gaps in your resume:

✓ Gaps less than six months do not need to be explained.
✓ Explain extensive gaps in a cover letter, email, or interview if you’re able to secure one.
✓ Use years instead of months on your resume.
✓ Incorporate transferable skills that you have developed during your time off.
Resume Sections

Contact Information
- Include your name, address, telephone number, and e-mail address at the top of the resume.
- Make your name stand out by slightly increasing the font size (14 to 18 point) or making it bold.
- Use a professional e-mail address such as your name or use your Westminster College email.

Objective/Resume Summary
- Objectives are optional and typically unnecessary. If you choose to include an objective, it should be a short phrase that outlines your career goals related to the position you are applying for. You do not need an objective if your resume clearly shows your skills, accomplishments, and experience related to the job.
- An alternative to an objective is a resume summary, which is also optional. A resume summary is a two to four sentence statement that provides an overall view of your background and skills.
- Objectives or resume summaries can be used if a space filler is needed; however, it is important to keep in mind that if you use either one of these elements, you will want to tailor your objective or resume summary to the position you are applying for.

Education
- List your academic background in descending chronological order (most recent first).
- List each degree and the date you obtained that degree. If you are still working toward your degree, list the degree you are seeking along with your expected graduation date.
- You may want to emphasize a particular major or concentration with in your degree.
- List the full name of the college or university you are attending and the location.
- Include your GPA if above a 3.0.
- Including high school or transfer information after the sophomore year is not necessary unless there are exceptional accomplishments or extensive experience that is relevant to the position for which you are applying.
- You may want to add a subheading called “Relevant Coursework” to list classes you have taken that illustrate your academic background in a particular area. It is very common for people in technical fields to have extensive “Projects” sections.

Highlighting Your Skills
The secret to writing an effective resume is to tailor your resume in a way that best highlights the most relevant information to the position for which you are applying. Unlike an employment application, a resume does not necessarily list every experience you have ever had; instead, it should focus on only the most important information targeted to match the requirements of the job you are seeking. Create section headings to reflect your background. For example, if you are applying for a manager position and have previous experience, you should create a section named “Managerial/Leadership Experience.”

Work Experience
- List your job title and the name of the company on the left-hand side of the page. You can make either title or company stand out by italicizing or bolding the information.
- List the time period of your employment using the month and year. Consider listing on the right-hand side of the page for a cleaner look.
- Use strong, action-oriented words and short phrases to describe your experience. Incorporate language from the actual job description into your resume to show how your experience is directly related to the skills required for that position.
- Quantify results and list accomplishments whenever possible.
- Utilize bullet points to make the information flow.
- Place the most relevant skills at the top of each skill set so employers can find it as easy as possible.

Activities/Honors/Volunteer Experience
- Related, unpaid experience is equally as important as work experience. List relevant leadership and/or volunteer experiences just as you would list a job. Include your title, organization name, dates, and important skills.
- Extracurricular, volunteer, athletic, and/or leadership activities can be included in a single section or separate sections, depending on how many of each you have to show.
- You can simply list your experiences or describe them in greater detail depending on the relevant skills you would like to highlight.

Computer/Language/Technical Skills
- This section is used to show concrete skills, including language proficiency, computer, technical, laboratory, or others that are relevant to the position.
- Do not include “soft skills” such as communication, leadership, or problem solving. They are too vague to add value to the resume presentation.
Often, resumes and/or online applications are initially screened through a computer database by key words to determine if you have the experience necessary for the position before your resume is viewed by an actual person. Use key words and industry language to ensure that your resume or application makes it through the initial screening process.

### Submitting Your Resume Electronically

E-mail your resume as a PDF document when possible. Utilize your name in the file name when saving your documents. Follow up with a simple e-mail to the employer to ensure that he/she received your materials. If the employer requests a text, or scannable resume, keep formatting simple and avoid underlining, italics, bullet points, bolding and lines.

### Online Applications

Online applications are a common way to apply for a position with a company or organization. Many of the same guidelines that you use for a resume are true for an online application as well. Just like a resume, an online application is the first impression that you give an employer. It is a reflection of your professionalism, maturity, and attention to detail.

It is essential that you complete all of the fields in an online application. Do not leave any blank. Do not say “See Resume.” Online applications can take anywhere from one to two hours to complete, so take your time and be sure to tailor your application to the position for which you are applying. Use key words from the job description. Check your spelling and grammar and use appropriate punctuation.

Be honest on your application. Answer all the questions about criminal record, driving record, and reason for leaving a previous position honestly. Employers will discuss the circumstances of your responses during the interview but it is important that you are straightforward from the beginning. When answering questions about your previous experiences, be positive and talk about the lessons you have learned.

Attach a resume and cover letter with your application and follow up with a personal email to a recruiter, if possible, letting him or her know that you have submitted your online application.

### References

When employers ask for a reference, they are asking for the name of someone who they can contact to learn more about you. It is very important that you choose your references carefully.

### Choosing Your References

- When choosing your references, select three to five individuals who know you professionally, such as a supervisor, professor, and/or advisor.
- It is very important that you ask permission prior to listing someone as a reference because you want to make sure that he or she will give you a positive reference.
- It is a good idea to notify your references prior to an interview to let them know that they may be contacted.
- You may want to e-mail each reference a copy of the job description for which you are applying and another copy of your resume.

### Including Your References

- When including your references with a resume, list them on a separate page with the title “References” as a heading.
- Whenever you include a second page with a resume, it is a good idea to put your name on the top of the page in case your pages get separated.
- List the name, job title, company, address, phone number and professional email of each person.

Bring your list of references with you to interviews, and have them available to include with applications.

### On-line Portfolio

To stay up to date with today’s technology, employers may ask you to supply them with a video resume rather than a paper one. Just like a regular resume, this should be a brief introduction of a job application, describing your qualifications, experiences, and interest to the employer, through digital means. This is a great way to demonstrate your public speaking skills, interpersonal skills, and technical skills to an potential employer.

### Tips on How to Make a Video Resume:

- Should be one to three minutes long
- Creativity can help you stand out, but be careful not to be unprofessional
- Don’t read your resume
- Be dressed professionally
- Make sure the background is free of noise
- Start your video with your name
- Speak clearly and not too fast
- State what your future endeavors are and why you are the best candidate for the company
- Thank the viewers for their consideration
REFERENCES

Guidelines

- Create a separate page for your references on paper that matches your resume and cover letter

- **Always** ask permission before using an individual’s name as a reference, and ask for his or her preferred contact information

- Center information on page

- List name, title, employer or organization, mailing address, phone number and e-mail address for each reference

- Do not use relatives or friends as references; use people who know about your work-related abilities on the job or in the classroom

- Request letters of reference from individuals who will **provide candid and positive recommendations**

- Former employers, internship or volunteer project supervisors, and faculty are good choices

- 3 to 5 references are appropriate

- Have your page of references prepared in the event you are asked to provide them and to take with you to interviews

- Ordinarily, references should not be submitted unless requested as part of the application process

E- Portfolios

The E-Portfolio is a collection of electronic evidence assembled and managed by a user, usually on the Web. Such electronic evidence may include inputted text, electronic files, images, multimedia, blog entries, and hyperlinks. It will provide the viewer with in-depth, multi-dimensional information about you in a compact, user-friendly format.

Portfolios provide samples of your work, add to your credentials, and are most common in creative fields such as art, advertising, architecture, writing, and photography. Portfolios may include:

- Design work or blueprints
- Photos
- Videos
- Project reports
- Letters of commendation
- Certificates

Today’s employers in creative fields want to see that you can think strategically and creatively for the business environments you are entering. One of the most critical components of your portfolio should be a sample project detailing a major planning and design project you were given and providing the details of your planning and design strategy. Employers want to see a big idea that involved working through several planning and design phases. Illustrate how you developed touch points for the clients or customer base you were attempting to reach.

You will want to create a well-organized and neatly designed binder to represent your work:

- Photocopy content so as not to lose originals.
- Size your documents consistently for a clean presentation.
- Try using collages to illustrate visual work.
- Use color to draw attention to your portfolio.
- Use sheet protectors - using the front and back to link documents.
- Store extra items behind displayed documents.
- Employers may want you to submit your portfolios over the internet (e-portfolio)

These free useful websites can help you to electronically submit and showcase your resume, written projects, art, and designs:

- wordpress.com
- portfolios.com
- wix.com
- weebly.com
- opresume.com
- rcampus.com
- behance.net

Sample Cover Letter

Box 222 Westminster College  
New Wilmington, PA 16172

June 5, 2013

Mr. John Miller  
Principal  
Old Castle High School  
700 N. Washington Street  
Old Castle, PA 11111

Dear Mr. Miller:

I am writing to express my interest in applying for a teaching position, on the elementary level, in your school district. As a 2013 graduate of Westminster College, I have student teaching experience on the third and fifth/sixth grade level, in a rural school district. I have enclosed my resume for your review.

At the present time, I am teaching fifth and sixth grade learning support at Onion Middle School. This position enables me to provide these students with specialized instruction in basic skills they have not yet mastered. I am challenged to be creative, attentive and most of all, patient. At my previous student teaching placement, I worked with third grade at Onion Memorial Elementary. That position allowed me to work with short and long term planning, creative plans and various educational technologies.

Along with my skills, I will bring a positive energy to the school and a desire to get involved and work for a common goal. In previous placements, I have demonstrated time management skills, multi-tasking, and an eagerness to work with others. Combined with my enthusiasm and commitment, I am confident that I will be a valuable member of the school community.

I believe every child deserves the opportunity to learn in the way that best suits their needs. It is my goal as a teacher to support my students in this quest and to inspire lifelong learners. I would welcome the privilege of meeting with you to discuss any positions you have available. Please contact me at (724)777-5555 or by email at menowh@wclive.westminster.edu if you have any questions.

Thank you for your time and consideration.

Sincerely,

Hirer Menow

Enclosure

- Student Westminster Admissions Team, campus tour guide, 4 years
- Fresh Start Leader, first year orientation, 3 years
- Habitat for Humanity, 3 year volunteer
- Young Presbyterian Scholars Program
- Community Fellows, AmeriCorps program participant
JOB SEARCH

Before You Start Your Search
Job searching can be an overwhelming process and may take longer than you would like. You have probably heard the phrase, “Looking for a full-time job is a full-time job.” Conducting a job search does not necessarily take 40 hours a week, but it does require that you put in the work it takes to be a competitive candidate.

It is more important than ever to do everything in your power to enhance your presentation as a candidate and to utilize a combination of job search methods to ensure your success.

1- Know Yourself
You will be more successful in your job search if you are confident that your experience and skills qualify you for the position for which you are applying. To do this, you must have a clear idea of your skills, interests, accomplishments, experience, goals, and values. For clarity, you may want to see a career counselor in Career Services.

2- Match Yourself to the Right Position
Thoroughly research the position and organization to which you are applying. Think about products and services offered, growth, competitors, number of employees, organizational structure, geographic locations, working climate, benefits, community involvement, and anything else that you consider important.

3- Pay Attention to Detail
Tailor your resume, cover letter, online application, and interview answers specifically to each position for which you have applied.

4- Be Focused
Be persistent and follow-up. Keep careful records of your job search process, including all materials used in the job search: resumes, references, recommendation letters, cover letters, job postings, research conducted on employers, correspondence from employers, and any other relevant materials.

5- Have a Positive Attitude
Be flexible in a tough job market. This could mean being willing to relocate, expand your horizon from the ideal job to more tangentially related areas, or accept a more entry-level position than anticipated. College graduates are promotable.

Keep perspective and know that behind every slowdown and downturn in history there is a recovery, so keep your eye on the long run.

Working Your Network
It has frequently been said that 80 percent of jobs that exist are not advertised. Often employers will rely on referrals and professional networks for the limited positions they have to fill. Networking is key to finding opportunities in a tight job market as fewer positions are advertised.

Networking is not asking for a job; it is developing a broad range of contacts. The key to networking starts before the job search. For college students, involvement on campus is one way to build a cadre of supportive colleagues and alumni. In particular, students should pursue involvement with professional associations related to their field of study, both on and off campus. Professional associations bring leaders of organizations to meetings and these can be key contacts for referral to professional opportunities.

Networking is not a magical process, but rather the art of opening up conversation and engaging another individual. Be curious about the individuals you meet and engage them in questions about themselves and their careers. Follow up with individuals who interest you. Share your appreciation and ask for more information. You may want to arrange an informational interview, a face-to-face meeting, to get first-hand information and advice about pursuing your career field of interest. Most important, smile and present yourself positively and professionally.

In a nutshell, networking is simply talking to people. People love to share their expertise and knowledge when they can. They have been in your shoes and remember how hard it was. The easiest way to break the ice is to start with the people you know — friends, trusted colleagues, relatives, former classmates, professors, and advisors.

Arranging personal visits to professionals in your field of interest, attending professional events and educational sessions and visiting employment centers or departments where you desire to work can make a major difference in employment leads and eventual job offers.

It's not who you know...It's who knows you!
Job Bulletin

As a current Westminster student or alumni, you have access to an online recruiting system designed specifically for you, called Titan Employment Bulletin. This bulletin can be found on My.Westminster.

On-Campus Interviews

On-campus interviews are an important tool to save you time and energy in your job search process. Recruiters from across the region come to Westminster College to interview qualified candidates to fill their full-time, part-time and internship openings. On-campus interview opportunities are available through various postings as well as the Internship and Part Job Newsletter which is currently emailed weekly to students.

Many employers coming to campus will also host information sessions for candidates and others who want to learn more about their organizations. These presentations are an integral part of the interview process and an excellent way for you to meet recruiters interested in hiring Westminster students and alumni.
Career Fairs

The Career Center, along with a consortium of 14 other schools, hosts two main career fairs each academic year for students and alumni of all majors. These events attract employers and are ideal for graduating seniors and alumni looking for full-time employment, as well as undergraduate students looking for internships and career-related experience.

All students are encouraged to attend in order to network with human resources and corporate personnel – you can obtain career information, learn about current and future openings, gather information critical to your job search, and possibly apply for a job.

The Western PA Collegiate Job & Internship Fair is the largest job fair in the Pittsburgh region for college students and alumni. It is hosted by a consortium of colleges in Western PA and is open to current students and alumni.

Please join us for the 2015-2016 Fairs:

Western PA Collegiate Job & Internship Fair

Wednesday, October 14, 2015
10am - 3pm

Wednesday, March 9, 2016
10am - 3pm
Monroeville Convention Center
Monroeville, PA

PERC Teacher Job Fair

Wednesday, March 30, 2016
10am - 3pm
Monroeville Convention Center
Monroeville, PA

Career Fair Tips

Review the list of attending organizations on the Career Services website and research those of interest. A list of attending employers can be found on the Western PA Career Services website: www.westpacs.org.

Make sure your resume has been proofread and is ready to sell your skills. Visit Career Services to have a counselor review your resume to make sure it is ready to share with potential employers.

Bring enough copies of your resume so you can present one to each organization that interests you; keep in mind, there may be last-minute additions at the event.

Prepare a 30-second introduction about yourself that quickly tells the employer the kind of position in which you are interested.

Practice your interviewing skills. Even though this is a fair, the employer still may ask you questions about experience so you need to be prepared. You may also be invited for an interview following the fair.

Dress to impress! This will be your first impression with the employers you meet and you want it to be a positive one. Comfortable shoes are recommended since you will be walking and standing, but make sure they are still professional.

Pursue company-specific questions to ask employers and start building relationships that can lead to opportunities later.

Collect business cards and follow up with organizations.
Social Networking Sites

Job seekers need to be attentive to their online presence as Cancellations with less than 24 hours’ notice will normally much as their in-person presence. It can never be assumed require a letter of apology to the recruiter. Failure to that sites like Facebook.com or Twitter are private and only follow these guidelines can lead to suspension from futures for social connections. Make sure that you would be on-campus interviews.

comfortable sharing what is found on your social networking sites with potential employers.

- Don’t post photos or descriptions of yourself involved in illegal activity—drugs, underage drinking, or violence.
- Don’t post political or religious opinions or preferences.
- Make sure any information about degrees or credentials posted is accurate and verifiable.
- Don’t post photos, stories, or Internet links you wouldn’t want a potential boss to see.
- Don’t post your age, marital status, or parental status.

Although federal and state laws protect against discrimination based on those factors, such protection can erode after self-disclosure in a public forum.

- Be careful what you name a personal web page.
- Use privacy settings to restrict information.

On the flip side, social networking sites are increasingly being used for professional networking and job searching. LinkedIn is one example of a networking site designed for professionals and businesses to connect with one another. In addition, many students are utilizing Facebook as a means for job searching.

Recruitment Policies

Recruiters spend much time, money, and effort locating the right people for their organizations through the use of WESTMINSTER COLLEGE Career Center.

In order for the Career Center to attract and retain organizations interested in hiring WESTMINSTER COLLEGE students and alumni, you must act with the highest degree of professionalism. This includes providing accurate information and following through on all commitments made.

Interview appointments

On-campus Interviews scheduled through the Career Center or at Westminster career fairs are important commitments on behalf of both the candidates and the recruiters. A student/ alumnus who fails to show up for an appointment or cancels with less than 24 hours’ notice damages the college’s reputation, wastes the recruiter’s time, and may cost another student/alumnus a job or internship opportunity.

Best Companies To Work For

Where do you want to work? Spend time researching the industries you are interested in and find out which companies have the best ratings. The following sites can be useful resources to help you rank companies according to size, growth potential, innovation, diversity and other key factors.

Job Search Success Checklist

Step 1: Know Yourself and Where You Want to Work

_____ Identified my personal strengths, skills, interests and values by completing a self-assessment
_____ Made a list of possible job titles/fields of interest, typical entry-level jobs and salaries
_____ Researched organizations or companies for which I would like to work
_____ Clarified my career goals by meeting with a Career Services staff member

Step 2: Prepare for Your Search

_____ Had my resume and cover letter reviewed by Career Services
_____ Activated my LinkedIn account and uploaded my resume
_____ Developed my “30-second speech” for short encounters with employers
_____ Identified three individuals who can serve as references
_____ Completed a mock interview with Career Services
_____ Obtained an interview outfit that is appropriate for the field in which I plan to work
_____ Ensured the professionalism of my voice mail message, email address, and social networking site

Step 3: Start Searching

_____ Joined professional associations in my field of interest and attended networking events
_____ Regularly checked The Titan Employment Bulletin or online Internship & PT Job Newsletter for career opportunities and on-campus interviewing opportunities
_____ Attended a career fair hosted by WestPAC’S
_____ Developed a system for keeping track of my contacts, interviews and other job search activities
_____ Followed up on every interesting job lead immediately
_____ Developed a list of potential networking contacts and kept in touch with them
INTERVIEWING

Preparation for Your Interview

Interviews provide an opportunity for a potential employer to learn more about you and for you to learn more about an employer, the position. At this point, the employer has reviewed your resume and is familiar with your qualifications. Employers are looking more at your “soft skills” such as interpersonal skills, teamwork, and professionalism. The interview allows you to showcase your communication skills by articulating the qualifications that you think make you the best candidate for the position and company.

Employers are looking for a good fit—someone who has the right background and personality to blend in well with the company. Attitude and personality are just as important as qualifications. Be yourself, but be your best self. Preparing for an interview is equally as important as the interview itself and will help you feel relaxed and more confident during the interview.

Know Yourself

Spend some time familiarizing yourself with your qualifications and accomplishments by looking over your resume. Get to know your personal attributes and skills by taking a self-assessment. Think about your career goals—where do you see yourself down the road?

Research the Company

Doing your homework not only impresses the recruiter, but it also helps you choose the company that is most suited to you. Demonstrating the fact that you have researched a company can set you apart from other candidates. Employers want people who know something about their company before they step into the interview room.

Prepare Answers to Interview Questions

Review a list of common interview questions and practice your answers. Not every interview will be the same, but preparing answers to some common questions will help you focus on the most important information to convey during an interview.

Practice answering questions in front of a mirror or role-play with a career counselor or a close friend who can give you constructive feedback. The important thing is not to memorize your answers word by word but to become familiar enough with the information that you can confidently express your ideas to the employer. Practice your interviewing skills by participating in a videotaped mock interview through Career Services.

Prepare Questions to Ask the Employer

At the end of almost every interview, the employer will ask you if you have any questions for them. This is a great time to show off your knowledge of the company and your enthusiasm for the position. Asking intelligent questions lets the interviewer know that you are interested, which could set you apart from other candidates. It’s always a good idea to prepare a few questions in advance.

What do you like most about working for this company?
What attracted you to this company?
What are your company’s goals in the next few years?
What qualities are you looking for in a successful candidate for this position?
Could you describe a typical day in this position?
Who are the people I’d be working with in this position, and what are their roles?

Questions to Avoid

Avoid asking questions about salary, vacation, holidays, and/or sick day schedules. Let the employer approach these issues first. You want to show your interest in the employer and position and not your own personal desires.

Phone/Webcam Interviews

Phone and webcam interviews are used to screen candidates early in the interview process as a cost-saving technique before inviting candidates for an on-site interview. They can be with one person or a panel of people and can last anywhere from 10 minutes to one hour.

Helpful tips for phone and webcam interviews:

- Give yourself a minimum of 30 minutes when scheduling your interview. You do not want to cut the interviewer off or rush through your interview.
- Make sure that your phone or laptop is fully charged or plugged in.
- Create a quiet place free of distractions from pets, visitors, television, children, or other phone calls. If need be, you may use the Career Services facilities to have your interview.
- Have your resume, job description, questions for the interviewer, pen, paper and other prepared notes in front of you. However, don’t get distracted by shuffling papers during the interview.
- Make a note of everyone on the other end of the interview when they introduce themselves and use their names throughout the interview whenever possible.
For phone interviews:
• Do not interrupt your interview to take another call if you have call waiting.
• Be aware that walking around the room may affect your signal. It is recommended to use a landline to avoid dropped calls.
• Answer the call with your name to avoid an awkward start to the interview.
• Smile when you talk—your enthusiasm will be heard by the interviewer.
• You can't count on clues from an interviewer's body language, so avoid being too long-winded. Pauses are a normal part of phone interviews because the interviewer is trying to avoid interrupting you. Stay focused, calm, and friendly.

For webcam interviews:
• Create a professional webcam username.
• Login early so the employer knows you are prepared.
• Dress professionally from head to toe. The employer may ask for a full-body shot.
• Look directly into the camera and avoid wandering eyes. Avoid leaving the camera view until the interview is completely finished.
• Be sure to set up the camera view in a professional, clean setting.
• Adjust any light sources in the room to highlight your face, with no lights shining into the camera.
• Test out your webcam, microphone, and speakers before your interview to make sure they are working properly. Practice with a Career Counselor or friend so that you can make sure the equipment is working on the other end.
• Make sure your area has a strong internet connection to avoid dropped calls.
• Don't forget to use positive body language, just as if you were having the interview in person: good posture, hand gestures, and facial expressions.

Dressing Professionally
Most experts agree that 80 percent of an interviewer's opinion of a candidate is based solely on his or her first impression. Professional dress, positive body language, and a well-groomed appearance are important components of that first impression.

Dress codes vary by company and industry, making it difficult to decide the most appropriate interview attire. Some employers have adopted "business casual" dress policies for everyday wear, but that doesn't mean you should dress casually for the interview. Always dress business professional!

Interviewing Tips

Dress professionally and be well-groomed. Arrive at least 10 minutes early. Drive the route the day before if necessary.
Bring extra copies of your resume and your references.
Carry a leather-bound folder for taking notes or carrying handouts.
Present positive body language by smiling and making eye contact.
Make a good impression by shaking hands and remembering and using people's names.
Treat everyone with whom you come in contact respectfully, including the receptionist at the front desk.
Make small talk easily so you will come across as easy-going and relaxed.

You may be concerned that you are not the "suit and tie" type. Your individuality is important, but you will have plenty of opportunity to display your unique style once you have the job. Use the interview to determine the culture of the company, including dress policies, but do not give the employer any reason to select someone else over you before they have had a chance to get to know you.

Avoid Strong Fragrances—Wear deodorant, but don't wear perfume, cologne, or aftershave. The interviewer may not have the same taste as you, and you don't want to overpower the room.

Be Well-Groomed—Clean nails, showered, good breath, and a neat hairstyle are always crucial. Shined shoes and fresh clothes that are crisply ironed are also important. Bring some mints.

Test-Drive Your Interview Outfit—It's a good idea to "try out" your interview outfit once or twice before the interview so you know how you feel in it while walking, sitting, and standing. Also, make sure your suit fits well. If it doesn't, have it altered. A well-fitted suit looks professional and gives you confidence.

Avoid Items That Scream "Student"—Backpacks, gigantic water bottles, and other campus gear are not necessary at an interview. Also, turn your cell phone OFF! Even a cell phone on vibrate is enough of a nuisance and distraction during an interview to turn off a potential employer.

Less Is More—Keep your look simple. Wear minimal jewelry and no visible body piercings or tattoos.
Hair neatly trimmed and styled; facial hair neatly groomed; avoid cologne

Conservative, two-piece suit in a dark color - navy, black or gray

Minimal jewelry; neatly groomed nails

Subtle shirt; coordinating necktie with a subtle pattern; undershirt; matching belt

Dark leather shoes to match your suit; polished

Dark socks that fully cover calves when seated; no white athletic socks
Conservative, two-piece dark suit - navy, black, or gray (pants or skirt)

Neatly groomed nails; plain, simple handbag

Closed-toe shoes; polished; avoid heels over two inches

Hair neatly trimmed and styled; minimal makeup; avoid perfume

Simple, minimal jewelry; plain shell or blouse; avoid low-cut tops

Skin-colored stockings or socks; avoid bare legs; cover visible tattoos

Shirt should be tucked in neatly
Answering Interview Questions

It's normal to be nervous during an interview. Take a deep breath and keep the tone conversational. Some interviewers may ask you a set of predetermined questions, and others may be more conversational and ask open-ended questions based on your resume. Find a balance between listening and speaking.

Listen and Observe — Try to follow the interviewer's lead and watch for signals from the employer as to whether your responses are too short or too long. Adapt to the interviewer’s style.

Practice Patience— Don’t let a tough question throw you off. Don’t be afraid to ask for clarification if needed, and give yourself time to think before responding.

Stay Positive - Always speak positively of past experiences and previous employers. Emphasize what you learned from past experiences, not what you didn’t like.

Develop a Personal Theme — Know three good reasons why you are an outstanding candidate for that position and/or company and weave them into the interview.

Be Enthusiastic — Communicate your passion for this particular position, company, and industry. At the end of the interview, let the interviewer know that you are interested in this position.

Use Positive Body Language— Refer to our Verbal and Non-Verbal Communication Tips.

Be Specific: Use the STAR Method — Don't just say, "I'm a good manager." Give an example of how you have demonstrated good management skills. Describe a Situation, the Tasks defined in the situation, the Actions that you took, and the Results of those actions. Using examples is one of the most important components of good interviewing!

Behavior-Based Interview Questions

Behavior-based interviewing has become a common interviewing technique. Interviewers will ask you to describe a specific example of a past behavior in order to predict future behavior.

For example, an interviewer might ask, “Tell me about a time when you had to work under intense pressure to meet a deadline.” In this case, the interviewer wants you to describe an actual situation using specific details, how you handled the situation, and the outcome of the situation.

Tell the interviewer a good story with the details of the situation. An interesting story makes you a more memorable candidate. Coming up with detailed examples of specific past events on the spot can be difficult. Use the sample questions below as a guide to get started. Think of situations you have handled in previous work and school experiences.

Sample Behavioral Interview Questions

Tell me about a time when you had to deal with a difficult situation.

Describe a time when you had to assist a colleague.

Give me an example of a time when you had to defend your idea.

Describe a time you found it necessary to make an unpopular decision.

Give me an example of when you had to work on a team with someone you couldn’t get along with and you resolved it.

Verbal and Non-Verbal Communication Tips

Body Talk

• Posture: Sit up right and do not cross your arms.
• Facial Expressions: Show how you feel and don't forget to smile.
• Hand Gestures: Emphasize what you mean.
• Accessories: Should not be played with during the interview.
• Distance: Keep a comfortable space between you and the interviewer.
• Eye Contact: Shows you're engaged in the conversation.

Vocal Quality

• Pitch: Fluctuate to emphasize emotions or feelings.
• Rate: Do not rush.
• Pacing: Vary delivery to maintain the listener's attention.
• Diction: Be clear and concise.
• Volume: Speak up.
• Breathing: Breathe normally before and during your interview.
• Pausing: Allows you to take breaks from talking or to gather your thoughts.
Sample Interview Questions

Here are some standard questions that you may be asked during an interview along with suggestions of how to craft your answers. It is important to practice what you will say in advance so you are comfortable when answering during the actual interview.

Tell me about yourself.
Keep your answer brief and concise (60-90 seconds). Highlight your academic background, work experience, and personal attributes that are relevant to the position. Express your enthusiasm for the position and your desire to work for the company.

Why do you want to work for this company?
Tell a story about how you first became interested in this type of work. Point out how your previous experience shows a long-term interest in this industry. Explain why their company is the best fit for you based on your experience and future goals.

How do you stay current on issues in this industry?
Demonstrate a natural interest in the industry by describing publications or associations that you follow.

Where do you see yourself in three years?
Your answer should reflect your interest in staying involved with the company so the employer knows that you are a good investment. Having future goals demonstrates motivation and focus.

What qualifications do you have that will make you successful in this position?
Be specific. Remember to use examples of how you have demonstrated two or three skills in your previous experience.

What is one thing you need to work on?
Be honest, but put a positive spin on it. Recognizing your limitations shows maturity. Tell the employer what you have learned from your experience and how you have already worked to improve this shortcoming.

Describe your working relationship with your colleagues.
The employer is trying to gauge your interpersonal skills. Emphasize your ability to fit in with many different personality types and your willingness to be a part of the team.

Give an example of a challenging experience and how you overcame it.
Tell a story about a previous work or group project experience where you were able to problem solve. Describe how you were able to adapt, be flexible and help be a part of a positive solution. An employer will want someone who is able to be proactive, troubleshoot when necessary and maintain a positive work environment.

What do you like to do in your spare time?
The employer will ask a question like this to find out a little more about your personality. Describe your interests so the interviewer can learn more about you, but avoid over-sharing. Focus on positive and productive activities.

ADDITIONAL INTERVIEW QUESTIONS

What did you enjoy most/least about your previous job? Why?
Do you prefer working with others or alone?
Why are you the best person for this position?
What did you learn about yourself in your previous job?
What do you know about our company?
Why are you interested in this position?
Why are you interested in leaving your current position?
Why did you select your major?
What is the most difficult decision you have had to make since starting college?
What subject do you like least/ best? Why?
How has your college experience prepared you for your career?
How would you describe yourself?
What motivates you?
What are your hobbies?
What accomplishment are you most proud of and why?
What job or experience have you enjoyed the most and why?
What can you contribute to this organization?
### Responding to Personal Questions

Most professional interviewers are trained to ask only those questions that relate to the applicant’s ability to do the job; however, you should be aware of your rights as an applicant.

</tbody>
</table>

When faced with an illegal/personal question, you essentially have three choices:

- **Answer** the question, assuming you don’t mind sharing the information.
- **Refuse** to answer the question, knowing that you may risk appearing uncooperative or confrontational.
- **Answer** the underlying job-related question (recommended by the Career Center).

**Question:** Are you planning to have a family?

**Intent:** Are you willing to travel or relocate?

**Answer:** I am committed to my career and willing to travel or relocate if needed.
Following Up After the Interview

At the end of an interview, clarify any follow-up procedures such as the hiring timeline and any additional materials they may need. Be sure to get a business card of the person or persons who interviewed you so you will have the correct spelling of names when sending a thank-you note.

Reiterate your qualifications and your fit with the position and/or company. Be direct and state your interest in the position. Remember to smile and leave them with a positive feeling about your interview.

Fewer than half of candidates send a follow-up letter. Sending a thank-you letter is not only professional and polite, but it could give you the edge that sets you apart from other candidates.

Toward the end of the interviews, the employer will indicate a general time for when they will contact you. Only call the employer if the date has passed. If they did not specify a time, politely call or email asking them the status of their hiring decision.

Handling a Job Offer

Congratulations! You're hired! Verify the terms of your employment in writing. Most companies will send a letter as a standard practice. Ask the employer when you will receive a letter verifying the offer. It should confirm your salary, start date, location, job title, benefit information, and pre-employment requests such as the completion of a drug test. You should also send a letter verifying your acceptance with the same information.

Most employers complain that new graduates have unrealistic expectations about starting salaries. Research salary ranges for your field, keeping in mind geographic location. Salaries differ among metropolitan, suburban, and rural areas. Search the Internet for a cost-of-living calculator to determine the amount of money you will need to earn in a specific location to accommodate your needs.

Receiving multiple job offers is great, but it can be confusing. Ask employers how much time they are willing to give you to consider an offer before they need a decision. If offered a position, you should not be expected to make a decision on the spot. Analyze various offers by weighing the importance of certain criteria such as salary, location, job duties, benefits, opportunity for growth, company atmosphere, and work-related values job security, contribution to society, work/life balance.

If you don't get the job, don't think you wasted your time. Keep in mind that you have made important contacts within the company. You can send a short letter or e-mail to the hiring manager or human resources thanking them for their time and to keep you in mind for future positions.

Tips For Dining Out with a Potential Employer

Lunch or dinner during an interview may seem like a casual event, but in reality, this is still part of the interview. Making "small talk" is just as important as answering questions. You are being critiqued on your social skills and how well you handle yourself during a meal.

Order something that is easy to eat, not something time-consuming or messy. This is not the occasion for a whole lobster or barbecue ribs. Alcohol is not a good idea unless the host orders wine for the table. In that case, sip slowly and have only one glass.

Take your cue from the interviewer as to what to order, or ask for suggestions. Don't order the most or least expensive item on the menu.

Take small bites and you'll find it's easier to answer questions or join in table talk, and always chew with your mouth closed.

Don't smoke.

Don't complain about the food, service, or the restaurant.

Mirror the interviewer's lead when it comes to table manners.

Avoid controversial topics, gossip, or inappropriate jokes.
Sample Follow-Up Letters

2222 Bridgewood Avenue
Pittsburgh, PA 55555

October 17, 2015

Ms. Francis Hayes, Senior Accountant
XYZ Accounting Firm
9354 Center Street
Harrisburg, PA 88881

Dear Ms. Hayes:

Thank you for interviewing me for the accountant position with
XYZ Accounting Firm. I enjoyed meeting you and learning more about
your company’s growing needs.

After our conversation, I believe that my education and professional experiences
fit nicely with the job requirements. My analytical skills combined with my years
of experience in this field would allow me to make a significant contribution to
your firm.

I reiterate my strong interest in the position and in working for XYZ
accounting Firm. Please feel free to contact me at 702-555-1234 or
shosley@aol.com. Again, thank you for the interview and your consideration.

Sincerely,
(Your signature)
Sharon Bosley

Thank-you letters are used to express appreciation to an employer
for the opportunity to interview, to remind the employer of your
qualifications, and to reiterate your interest in the position if, in fact
you are interested.

Thank-you letters should be sent within 24 to 48 hours after the
interview and can be typed, handwritten, or e-mailed.

54 Lakewood Drive
New Castle, PA 55555

October 23, 2015

Mr. Harry Little,
Director Technical Design Group
Craig Engineering
1354 Airport Road
Cleveland, OH 34699

Dear Mr. Little:

I am writing to confirm my acceptance of your employment offer received
on March 20 as a program engineer for Craig Engineering Systems at an
annual salary of $43,000.

As we discussed, I will report to work at 8:00a.m. on November 15, 2013,
and will have completed the medical examination and drug testing.

I look forward to working with you and your staff and appreciate
the opportunity you have given me. Please feel free to contact me
at 702-555-0987 or jim@msn.com with any additional information.

Sincerely,
(Your Signature)
Jim Coldwell

Acceptance letters are used to affirm your employment decision,
confirm employment logistics, and express your appreciation for
the opportunity.
84 Vegas Lane  
Las Vegas, NV 89543  
April 17, 2014  
Ms. Isabel Rodriguez, Director  
Clark County Parks & Recreation Department  
1811 Main Street  
Las Vegas, NV 89118  

Dear Ms. Rodriguez:  

I am writing to inform you that I am withdrawing my application for the program coordinator position with the Clark County Parks & Recreation Department. I have decided to accept another opportunity that is a good match for my interests at this point in my career.

Thank you very much for your time and consideration. I enjoyed meeting you and learning more about your programs.

Sincerely,  
(Your signature)  
Kelly Livingston

---

Withdrawal letters are used to politely and professionally withdraw your name from consideration if you have accepted another offer or are certain that you would not accept an offer from the potential employer to whom you are writing.

---

765 Main Avenue  
Harrisburg, PA 22234  
September 18, 2014  
Mr. Robert Shultz, Manager  
Casino Property Hotel  
3456 Erie Boulevard  
Erie, PA 15223  

Dear Mr. Shultz:

Thank you very much for offering me the position of front desk manager with the Casino Property Hotel. I appreciate your discussing the details of the position with me and giving me time to consider your offer.

Although there are many aspects of the position that are appealing to me, I believe it is in our mutual best interests that I decline your kind offer.

Thank you for the consideration and courtesy given to me. It was a pleasure meeting you.

Sincerely,  
(Your signature)  
Daniel Foster

---

Rejection letters are used to politely and professionally decline an employment offer and express appreciation for the opportunity.
Interview Checklist

PREPARING TO ANSWER AND ASK INTERVIEW QUESTIONS
☐ Had my resume reviewed by Career Services and made the corrections suggested by the counselor
☐ Completed a mock interview at Career Services and am working hard to make changes in areas where I need improvement
☐ Reviewed my resume to become familiar with my qualifications and work skills so I will be more relaxed and confident during the interview
☐ Researched the organization that I am interviewing with
☐ Practiced answering some common interview questions
☐ Prepared examples to answer situational and behavior-based questions
☐ Have a minimum of 3 questions ready to ask the employer at the end of the interview and know which questions to avoid asking

PREPARING FOR THE DAY OF THE INTERVIEW
☐ Driven the route to the interview location and know how much time it takes to get there
☐ Tried on my “interview outfit” and feel assured it fits well, looks professional and is appropriate
☐ Have extra copies of my resume and references to take to the interview

DURING THE INTERVIEW
☐ Know I must remain positive throughout the entire interview process

AFTER THE INTERVIEW
☐ Get a business card from the person or persons conducting the interview so I can send a thank-you letter within 24-48 hours after the interview
GRADUATE SCHOOL

During your career development and job search phases, you may find yourself considering an advance degree program in order to achieve your long term career goals. You may also consider obtaining a graduate degree in order to be more competitive in the job market. Here are some tips to help you along the way.

Preparing for a Graduate Program

Explore all of your options before choosing your graduate program. The program you choose should lead you to the job you want to do. Make sure the program you choose will give you the background and skills that you will need to be successful in your chosen career.

Once you zero in on the specific area of study you are interested in, you can start researching available programs using the following resources:

gradschools.com petersons.com
usnews.com/usnews/edu/beyond/bhome.htm
allaboutgradschool.com

Faculty members are also a great resource. Ask your professors, advisors, and other members of your major department what programs they recommend.

What are Graduate Schools Looking For?

Each school has its own criteria when reviewing applications, but generally speaking, graduate admissions professionals are looking at GPA (grade point average), test scores, and professional or research experience in your field. In addition, you will probably be asked to submit letters of recommendation.

Academics

The first thing your graduate program is going to do is look at your grades. How did you do in your college courses? It is assumed that your grades reflect your ability to learn, and since graduate school coursework is considered more difficult than undergraduate coursework, admissions counselors are looking at your previous academic record as an indicator of your potential success in graduate school. What does this mean for you now? Do your homework. Take advantage of your professors' office hours if you are struggling with a class. Don't miss any opportunity that you have to increase your knowledge base.

Experience

Making the decision to apply to graduate school is huge. With this decision you are declaring that there is an area of interest that you want to pursue in depth and that you are willing to sacrifice your time and financial resources to become more knowledgeable.

Admissions counselors are looking for students who have a practical knowledge of their chosen area of study. They want to know that you are really interested in the field, not just choosing a program because you can't find a job or aren't ready to enter the work force. Get involved in any campus activity, club, or professional organization that will give you hands-on experience. Seek out internship opportunities that will give you career-related experience.

Test Scores

Below is a list of the common standardized tests you may have to take to apply for a graduate program. You will want to check with each program specifically to find out for sure.

Graduate School  GRE/MAT
Business School  GMAT
Law School  LSAT
Medical School  MCAT
Dental School  OAT
Pharmacy School  PCAT

GRE

The Graduate Record Examinations (GRE) is a standard admissions test that measures critical thinking, analytical writing, verbal reasoning, and quantitative reasoning skills that have been acquired over a long period of time and are not related to any specific field of study.

MAT

The Miller Analogies Test (MAT) is a standardized admissions test that measures your ability to identify verbal and quantitative analogies. Some universities accept MAT scores in lieu of GRE scores.

The MAT can be taken at the Career Center. Call 724-946-7338 to make an appointment.
The Application Process
There are some general procedures that most graduate schools follow when it comes to the application process, but you need to keep in mind that each school has the right to set up its procedures in the way that works best for it. It is important not to assume that all application processes are the same.

There is usually a nonrefundable application fee. The amount varies from university to university and at some institutions may be waived under certain circumstances. Check with the school to inquire about fee waivers.

Make sure your application is accurate, thorough, and easy to read and that your essay is on point, relevant, and puts you in the best possible light. If there was a time to pay attention to grammar, punctuation, and spelling, this is it. If you are submitting your application online, you will have to type it.

If you are submitting your application on paper, keep in mind that the easier it is to read, the more attention the admissions committee can give to understanding who you are.

What Goes Into an Application File?
An application file usually consists of the following:
- The application form and application fee (if required)
- A Statement of Purpose (also known as a Statement of Intent or a Statement of Reason)
- Official transcript of your academic work (this will need to be sent directly from Westminster to the school to which you are applying)
- Courses-in-progress/projected coursework (if you are working on a degree at the time of your application) Samples of written work, research, or a portfolio of work (commonly required for art, creative writing, and education programs)
- Letters of recommendation
- Test scores from standardized tests such as the GRE, GMAT, or MAT

Read your application carefully to determine exactly what is required for each application you are submitting.

Writing Your Statement of Purpose
Give your essay direction with a theme or a thesis. This is the main point you want to communicate.

Before you begin writing, organize your thoughts. What do you want to write about? What interests you? Where do your passions lie? What type of order can you put to your thoughts? What concrete examples from life experience do you have to support your theme?

Start your essay with a statement that will capture the attention of your reader. It can be an anecdote, quote, question, or description.

End your essay with a conclusion that refers back to the beginning and restates your theme. Proofread, proofread, and then proofread again. Have someone look at your document. Ask a professor, friend or family member to critique it. Be open to suggestions that will make your essay better. Keep an open mind.

Don’t try to impress your audience with your vocabulary, and don’t rely exclusively on spell-check to catch all spelling errors. You may have spelled your word correctly but misused it in a sentence.

Make sure your essay is a reflection of who you are. Don’t make things up in order to appear to be someone you aren’t.
Preparation for Graduate School Timeline

Junior Year
- Research schools online and browse through their graduate programs/admission requirements
- Schedule campus tours
- Request catalogs and application materials from potential schools
- Decide which programs you are interested in applying to and make a list of admissions requirements
- Mark down application deadlines
- Register for standardized test
- Prepare for testing via test prep/practice test books

Senior Year - September and October
- Take standardized test
- Draft your personal essay/purpose statement
- Research financial aid options - scholarships, graduate assistantships, fellowships
  contact school's financial aid office, etc.
- Request letters of recommendation from faculty members

Senior Year - November and December
- Have your personal essay/purpose statement proofread
- Finalize your personal essay/purpose statement
- Apply for financial aid, graduate assistantships, fellowships, etc.
- Request an official transcript (with fall semester grades) from the Registrar's Office for each school you are applying to
- Submit your application after verifying you have everything you need

Senior Year - February
- Submit your FAFSA

Senior Year - April through Summer
- Request an official transcript (with spring/final semester grades) from the Registrar's Office
  for each school you are applying to
- Submit official transcripts to each school
- Make a pro and con list if accepted to more than one school
- Submit acceptance materials to the school you will be attending
- Notify schools you decided not to attend of your decision
