

## Android Wireless Connection – WC-Secure

Open the Settings app and go to Wi-Fi. Select **WC-Secure** from the available networks.

Enter your Westminster username in the identity field and your Westminster password (the username does not include the “@westminster.edu” portion). Leave all other portions as their auto filled defaults.

**EAP method:** PEAP

**Phase 2 authentication:** MSCHAPV2

**CA certificate:** Use system certificates

**Online Certificates:** Do not verify

**Domain:** wc-cp-pub-01.westminster.edu

**Anonymous identity:** leave blank

You should then see a “Connected” under WC-Secure indicating you are connected to the network.
